## Version History

---

Version Number	Modification Date	Changes Completed
1.00	09-19-2016	Initial document.
2.00	12-22-2016	Consolidated reporting and tasks into one document.

# Introduction

---

SegPay's Reporting Service (SRS) allows you to make requests for various report data, and to execute a number of consumer support tasks.

Make requests to SRS to get the following data at any time for reporting:

- Active subscribers, by website, with their last/next billing dates
- Cancelled subscriptions by website
- Number of visitors to your pay pages, hour by hour, including the visitors' browser, country and/or region
- Revenue, detailing all signups, refunds, chargebacks and more
- Transactions, by website
- List of the websites SegPay is processing for you
- List of email and IP addresses you have blocked

Execute the following consumer support tasks:

- Cancel a membership (effective at the end of the subscription)
- Expire a membership (effective immediately)
- Refund a payment
- Update a consumer's login credentials
- Change a recurring charge amount
- Extend a membership by pushing the next recurring charge to a later date
- Block an IP (from accessing one of your websites)
- Block an email (from accessing one of your websites)

**Note:** SegPay can pass data associated with many support tasks back to you after the task executes. To make sure you receive this important data, set up **postback notifications** in the SegPay Merchant Portal at [sa.segpay.com](https://sa.segpay.com). Select *Merchant Setup*, *Merchant Management*, *PostBacks*, or contact SegPay tech support and they will take care of it for you.

## User ID and Access Key

Ask your SegPay rep for an SRS **User ID** and **User Access Key** so you can begin requesting the reporting data and tasks above. If you have multiple SegPay accounts, you'll be given a different SRS User ID and Access Key for each account, or you can request to have one login that works for all accounts.

# Reports

---

We recommend that you request certain SegPay reporting data on a daily basis, as a backup to the data you receive in postbacks. Postback data is pushed to you after a transaction is executed. Although uncommon, these pushes can fail, whether due to internet traffic or a variety of other reasons. Pulling from our system daily via SRS requests ensures that you receive the most current and accurate data to reconcile with what you get via postbacks.

## Developer Notes

- Go to [srs.segpay.com](https://srs.segpay.com) to see all available reports and the WSDL describing their functionality.
- When reports are updated, older versions will be maintained so your scripts continue to work. However, we recommend changing to the latest versions when they become available.
- Pass dates as **mmddyyyy**
- Pass an empty date value to default to today's date
- Pass a specific value for **URLID** to report only on that URL; pass **0** to return results associated with all of your URLs over the specified date range. (Each of your websites has a URLID value, which you can get by contacting your SegPay rep or checking our merchant portal).
- Using the **TransID** parameter:
  - Pass **TransID=0** with the same beginning/end dates to return all transactions for that one day.
  - Pass **TransID=string** (where *string* is a specific Transaction ID) with the same beginning/end dates to return all transactions on that day that have TransID values greater than the value you passed.
  - Pass **TransID=0** with a date range spanning multiple days to return the first 250 transactions for that date range.\*
  - Pass **TransID=string** (where *string* is a specific Transaction ID) with a date range spanning multiple days to return the next 250 transactions during that date range that have TransID values greater than the value you passed.\*

\*To get the next 250 transactions, make a recursive call passing the last **TransID** value you received from the previous data set. To ensure you get everything, continue this until you receive no data.

Below are descriptions of all the reports available via SRS. These include a variety of data that can help you track your business activity. In particular, SegPay recommends these three reports:

- *Transactions Purchases by URL* - detailed information about your transactions.
- *Transactions List* - all transactions.
- *Assets Cancelled* - cancelled subscriptions.

Here is the full list of what is available:

### Transactions Purchases By URL

View transaction details, for each of your websites, over a specific date range.

#### *Making the Request*

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/TransactionsPurchasesByURL?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&TransID=string&URLID=string>

## Definition of Parameters

Parameter	Definition
UserID	Your username to access SegPay Reporting Services (SRS).
UserAccessKey	Your unique key to access SegPay Reporting Services (SRS).
BegDate	Beginning date of the range you want to report on.
EndDate	End date of the range you want to report on.
TransID	Specific transaction you want data for (see <i>Developer Notes</i> above).
URLID	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:x
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <URL>www.spEU1020.com</URL>
      <TransID>26372853</TransID>
      <RelatedTransID>0</RelatedTransID>
      <TransTime>2016-03-08T10:57:30-05:00</TransTime>
      <Type>Sale</Type>
      <Source>Conversion</Source>
      <Auth>Yes</Auth>
      <TransAmount>12.0000</TransAmount>
      <Currency>USD</Currency>
      <AuthCode>TestTrans</AuthCode>
      <PurchaseID>23004406</PurchaseID>
      <PurchType>Delayed Capture</PurchType>
      <CustName>Jane Segblue</CustName>
      <CustEmail>[REDACTED]</CustEmail>
      <CustAddress>SPPADDRESS</CustAddress>
      <CustCity>SPPCITY</CustCity>
      <CustState>FL</CustState>
      <CustZip>12323</CustZip>
      <CustCountry>United States</CustCountry>
      <CustPhone>N/A</CustPhone>
      <CustIP>[REDACTED]</CustIP>
      <IPCountry>UNKNOWN</IPCountry>
```

## Assets Active Subscriptions By URL

View information about the active subscribers for each of your websites.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/AssetsActiveSubscriptionsByURL?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&PurchaseID=string&URLID=string>

#### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>PurchaseID</b>	Specific Purchase ID representing the transaction you want data for.
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:xml-msd
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <Domain>www.spEU1020.com</Domain>
      <PurchaseID>20103710</PurchaseID>
      <CustName>Jane Segblue</CustName>
      <Username/>
      <Password/>
      <RecurringAmount>19.9500</RecurringAmount>
      <Currency>USD</Currency>
      <NextDate>04/23/2010</NextDate>
      <Purchases>1</Purchases>
      <PurchTotal>2.9500</PurchTotal>
      <Cycling xml:space="preserve"></Cycling>
    </Data>
```

## Assets Active Subscriptions By URL and Rebill Date

View the active subscribers for each of your websites, with their recurring charge amounts and last/next billing dates.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

[https://srs.segpay.com/MWS.asmx/AssetsActiveSubscriptionsByURL\\_RebillDate?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&PurchaseID=string&URLID=string](https://srs.segpay.com/MWS.asmx/AssetsActiveSubscriptionsByURL_RebillDate?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&PurchaseID=string&URLID=string)

#### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>PurchaseID</b>	Specific Purchase ID representing the transaction you want data for.
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<?xml version="1.0" encoding="UTF-8" standalone="yes"?>
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <Domain>www.spEU1020.com</Domain>
      <PurchaseID>23004406</PurchaseID>
      <CustName>Jane Segblue</CustName>
      <Username>[REDACTED]</Username>
      <Password>sregresgres</Password>
      <RecurringAmount>12.0000</RecurringAmount>
      <Currency>USD</Currency>
      <LastDate>03/08/2016</LastDate>
      <NextDate>03/16/2016</NextDate>
      <Purchases>2</Purchases>
      <PurchTotal>12.0000</PurchTotal>
      <Cycling xml:space="preserve"></Cycling>
    </Data>
```

## Assets Cancelled Subscriptions By URL

View information about the cancelled subscribers for each of your websites.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/AssetsCancelledSubscriptionsByURL?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&PurchaseID=string&URLID=string>

#### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>PurchaseID</b>	Specific Purchase ID representing the transaction you want data for.
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:diffgram" data-bbox="178 556 534 722">
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <Domain>www.spEU1020.com</Domain>
      <PurchaseID>23004482</PurchaseID>
      <CustName>test test</CustName>
      <Username>syed12</Username>
      <Password>123456</Password>
      <RecurringAmount>21.5600</RecurringAmount>
      <Currency>USD</Currency>
      <Cancelled>03/08/2016</Cancelled>
      <ExpireDate>03/09/2016</ExpireDate>
      <Purchases>1</Purchases>
      <PurchTotal>7.6500</PurchTotal>
      <Cycling xml:space="preserve"></Cycling>
    </Data>
  </NewDataSet>
</diffgr:diffgram>
```

## Pay Page Stats Hits By URL

View the number of visitors to your payment pages each hour of the past 1-31 days.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/PayPageStatsHitsByURL?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&URLID=string>

## Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>URLID</b>	ID associated with the specific URL you are reporting on (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:diffgram-2008-04"
  <NewDataSet xmlns=""
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <URL>www.spEU1020.com</URL>
      <Date>04/01/2016</Date>

      <Hour_x003A_18>0</Hour_x003A_18>
      <Hour_x003A_19>0</Hour_x003A_19>
      <Hour_x003A_20>0</Hour_x003A_20>
      <Hour_x003A_21>0</Hour_x003A_21>
      <Hour_x003A_22>0</Hour_x003A_22>
      <Hour_x003A_23>0</Hour_x003A_23>
    </Data>
  </NewDataSet>
</diffgr:diffgram>
```

## Pay Page Stats Hits By URL & Country

View the number of visitors to your payment pages, including their origin country, over the past 1-31 days.

## Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

[https://srs.segpay.com/MWS.asmx/PayPageStatsHitsByURL\\_Country?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&URLID=string](https://srs.segpay.com/MWS.asmx/PayPageStatsHitsByURL_Country?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&URLID=string)

## Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <URL>www.segpayeu1.com</URL>
      <Country>United States</Country>
      <Date>03/08/2016</Date>
      <Total>1</Total>
      <Hour_x003A_00>0</Hour_x003A_00>
      <Hour_x003A_01>0</Hour_x003A_01>

## Pay Page Stats Hits By URL & Region

View the number of visitors to your payment pages, including their region – for example, the United States (US), Canada (CA), Europe (EU) – over the past 1-7 days.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

[https://srs.segpay.com/MWS.asmx/PayPageStatsHitsByURL\\_Region?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&URLID=string](https://srs.segpay.com/MWS.asmx/PayPageStatsHitsByURL_Region?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&URLID=string)

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```

<Data diffgr:id="Data1" msdata:rowOrder="0">
  <URL>www.segpayeu1.com</URL>
  <Region>CA</Region>
  <Date>03/08/2016</Date>

## Transactions List

View all transactions, for each of your websites, over a specified date range.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/TransactionsList?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&TransID=string&URLID=string>

## Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>TransID</b>	ID of the specific transaction you want data for (see <i>Developer Notes</i> above).
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:
  <NewDataSet xmlns=""
    <Data diffgr:id="Data1" msdata:rowOrder="0">
      <TransID>26373725</TransID>

## Transactions List Declined

View all declined transactions, by website, during a specified date range.

### *Making the Request*

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

[https://srs.segpay.com/MWS.asmx/TransactionsList\\_Declined?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&TransID=string&URLID=string](https://srs.segpay.com/MWS.asmx/TransactionsList_Declined?Userid=string&UserAccessKey=string&BegDate=string&EndDate=string&TransID=string&URLID=string)

### *Definition of Parameters*

<b>Parameter</b>	<b>Definition</b>
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>BegDate</b>	Beginning date of the range you want to report on.
<b>EndDate</b>	End date of the range you want to report on.
<b>TransID</b>	ID of the specific transaction you want data for (see <i>Developer Notes</i> above).
<b>URLID</b>	ID associated with the specific URL you want data for (see <i>Developer Notes</i> above).

Resulting XML dataset (example):

```
<Data diffgr:id="Data3" msdata:rowOrder="2">

## Get Merchant Fraud Emails

View a list of all of the email addresses you have blocked on your SegPay account.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/GetMerchantFraudEmails?Userid=string&UserAccessKey=string>

### Definition of Parameters

Parameter	Definition
UserID	Your username to access SegPay Reporting Services (SRS).
UserAccessKey	Your unique key to access SegPay Reporting Services (SRS).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:xml"
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">

    </Data>
  </NewDataSet>
</diffgr:diffgram>
```

## Get Merchant Fraud IP Address

View a list of all of the IP addresses you have blocked on your SegPay account.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/GetMerchantFraudIPAddress?Userid=string&UserAccessKey=string>

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:xml-msdata" xmlns:diffgr="urn:schemas-microsoft-com:xml-diffgram-v1">
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">

      <UserID>UserID</UserID>
    </Data>
  </NewDataSet>
</diffgr:diffgram>
```

## URL Listing

View each of the website URLs SegPay is processing for you.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

[https://srs.segpay.com/MWS.asmx/URL\\_Listing?Userid=string&UserAccessKey=string](https://srs.segpay.com/MWS.asmx/URL_Listing?Userid=string&UserAccessKey=string)

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).

Resulting XML dataset (example):

```
<diffgr:diffgram xmlns:msdata="urn:schemas-microsoft-com:xml-msdata" xmlns:diffgr="urn:schemas-microsoft-com:xml-diffgram-v1">
  <NewDataSet xmlns="">
    <Data diffgr:id="Data1" msdata:rowOrder="0">

      <ID>12997</ID>
      <Domain>www.spEU1020.com : www.spEU1020.com</Domain>
    </Data>
  </NewDataSet>
</diffgr:diffgram>
```

## Validate User Access

View your Merchant ID number. This can come in handy if you have multiple merchant IDs and don't recall which SRS User ID belongs to which merchant.

### Making the Request

Make an HTML Post or GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/MWS.asmx/ValidateUserAccess?Userid=string&UserAccessKey=string>

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).

Resulting XML dataset (example):

```
<int xmlns="http://srs.segpay.com/MWS.asmx">20656</int>
```

## Customer Support Tasks

You can perform a number of customer support and administrative tasks via SegPay Reporting Services (SRS). Go to [srs.segpay.com/adm.asmx](https://srs.segpay.com/adm.asmx) to see all available tasks and the WSDL describing their functionality.

### Cancel an Account

Use this request to cancel a subscription. The consumer will continue to have access to your service until the next bill date. However, instead of being billed on that date, the consumer's membership will expire, and he/she will receive an email notification confirming the cancellation.

### *Making the Request*

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/CancelMembership?Userid=string&UserAccessKey=string&PurchaseID=string&CancelReason=string>

### *Definition of Parameters*

<i>Parameter</i>	<i>Definition</i>
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>PurchaseID</b>	Purchase ID assigned to the subscription being cancelled.
<b>CancelReason</b>	Reason for cancellation (can be set to null).

### *System Responses*

After submitting the request, you will receive one of following responses:

<i>Response</i>	<i>Definition</i>
<b>Success</b>	The user is cancelled successfully.
<b>Subscription not active, cancel failed</b>	The subscription you are trying to cancel is not active.
<b>PurchaseID/MerchantID mismatch</b>	The purchase ID you sent is not valid.
<b>Invalid Merchant</b>	The UserAccessKey you sent is incorrect.
<b>Missing Parameter</b>	One of the parameters listed above is missing from your request. Examples: Missing parameter: PurchaseID.  Missing parameter: CancelReason.

## Expire an Account

Use this request to expire a subscription, which removes the consumer's access to your site immediately and generates an email notification to the consumer, confirming that their subscription has expired.

### Making the Request

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/ExpireMembership?Userid=string&UserAccessKey=string&PurchaseID=string&CancelReason=string>

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>PurchaseID</b>	Purchase ID assigned to the subscription being expired.
<b>CancelReason</b>	Reason for expiration (can be set to null).

### System Responses

After submitting the request, you will receive one of following responses:

Response	Definition
<b>Success</b>	The user's access was expired successfully.
<b>Subscription not active, cancel failed</b>	The subscription you are trying to expire is not active.
<b>PurchaseID/MerchantID mismatch</b>	The purchase ID you sent is not valid:
<b>Invalid Merchant</b>	The UserAccessKey you sent is incorrect.
<b>Missing Parameter</b>	One of the parameters listed above is missing from your request. Examples: Missing parameter: PurchaseID.

	Missing parameter: CancelReason.
--	----------------------------------

## Refund a Payment

Use this request to refund a specific transaction.

### Making the Request

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/RefundTransaction?Userid=string&UserAccessKey=string&TransID=string&RefundReason=string>

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>TransID</b>	Transaction ID of the payment to refund.
<b>RefundReason</b>	Reason for the refund. Required (can be set to null).

### System Responses

After submitting the request, you will receive one of following responses:

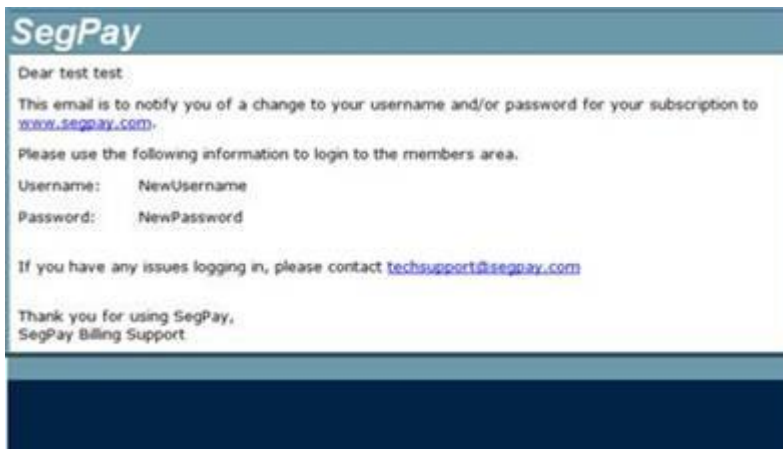

Response	Definition
<b>Success</b>	The payment was refunded successfully.
<b>Subscription not active, cancel failed</b>	The subscription you are trying to refund is not active.
<b>PurchaseID/MerchantID mismatch</b>	The purchase ID you sent is not valid.
<b>Invalid Merchant</b>	Either the username or password you sent is incorrect.
<b>Missing Parameter</b>	One of the parameters listed above is missing from your request. Examples:

	Missing parameter: TransID. Missing parameter: RefundReason.
--	---

## Update a Consumer's Login Info

Use this request to update a consumer's username and/or password in the SegPay system. This will generate an email notifying the consumer of the new information; however it will not generate a postback to your system.

Example email notification:

### Making the Request

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/UpdateUserNamePswd?Userid=string&UserAccessKey=string&PurchaseID=24987266&Username=NewUsername&Password=NewPassword>

### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>PurchaseID</b>	Purchase ID assigned to the subscription being updated.

<b>Username</b>	New username.
<b>Password</b>	New password.

#### *System Responses*

After submitting the request, you will receive one of following responses:

<i>Response</i>	<i>Definition</i>
<b>Success</b>	The username and/or password was updated successfully.
<b>Unsuccessful</b>	The username and/or password was not updated. Possible reason: the new values you sent are already on file.
<b>PurchaseID/MerchantID mismatch</b>	The Purchase ID you sent is not valid.
<b>Invalid Merchant</b>	<p>Either the UserID or UserAccessKey you sent is incorrect. The following may be included in the response:</p> <p>System.Exception: Invalid Merchant - UpdateUserNamePswd</p> <p>at NewSRSWebService.ADM.UpdateUserNamePswd(String Userid, String UserAccessKey, Int32 PurchaseID, String UserName, String Password)</p>
<b>Missing Parameter</b>	<p>One of the parameters listed above is missing from your request. Examples:</p> <p>Missing parameter: PurchaseID.</p> <p>Missing parameter: UserName.</p> <p>Missing parameter: Password.</p>

## Change a Recurring Charge Amount

Use this request to change the amount that a consumer will be charged on his/her next bill date. The consumer will receive an email with the new recurring amount.

#### *Making the request*

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/ModifyRebillAmount?Userid=string&UserAccessKey=string&PurchaseID=string&RecurringAmount=string&Comments=string>

Example values for each parameter:

<https://srs.segpay.com/ADM.aspx/ModifyRebillAmount?Userid=segpayblue&UserAccessKey=segpay2010&PurchaseID=24987266&RecurringAmount=19.95&Comments=CancelOfferAccepted>

#### Definition of Parameters

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>PurchaseID</b>	Purchase ID assigned to the subscription being updated.
<b>Recurring Amount</b>	Amount of the new recurring charge. Must be less than the current amount.
<b>Comments</b>	Comments about why the recurring charge was updated.

#### System Responses

After submitting the request, you will receive one of following responses:

Response	Definition
<b>Successful</b>	The amount was updated successfully.
<b>PurchaseID/MerchantID mismatch</b>	The Purchase ID you sent is not valid.
<b>Membership not active</b>	The subscription is not currently active.
<b>Failed</b>	All other error conditions besides those above. Please contact <a href="mailto:techsupport@segpay.com">techsupport@segpay.com</a> if you receive this response.

## Change a Recurring Bill Date

Use this request to extend a subscription by adding days to the current rebill date. The consumer will receive an email with the new recurring bill date.

### *Making the Request*

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/ExtendMembership?Userid=string&UserAccessKey=string&PurchaseID=string&Days=string>

Example values for each parameter:

<https://srs.segpay.com/ADM.aspx/ExtendMembership?Userid=string&UserAccessKey=string&PurchaseID=31263348&Days=20>

### *Definition of Parameters*

<i>Parameter</i>	<i>Definition</i>
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>PurchaseID</b>	The purchase ID for the subscription you want to update.
<b>Days</b>	<p>Number of days <i>to add to the current bill date</i>. For example, if next bill date is set for 2 days from now, and you specify 30 here, the next bill date will be 32 days from now.</p> <p>Please note that if billing is in the process of being retried when this request is made, the retry count and date will be set to 0 and the next rebill date will be updated per the previous paragraph.</p>

### *System Responses*

After submitting the request, you will receive one of following responses:

<i>Response</i>	<i>Definition</i>
<b>Successful</b>	The bill date was updated successfully.

<b>PurchaseID/MerchantID mismatch</b>	The Purchase ID you sent is not valid.
<b>Membership not active</b>	The subscription is not currently active.
<b>Failed</b>	All other error conditions besides those above. Please contact <a href="mailto:techsupport@segpay.com">techsupport@segpay.com</a> if you receive this response.

## Insert Consumer Note

Use this request to add a consumer support note to the system; for example, to document communication between you and the consumer.

### *Making the request*

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/InsertConsumerNote?Userid=string&UserAccessKey=string&PurchaseID=string&Note=string>

Example values for each parameter:

<https://srs.segpay.com/ADM.aspx/InsertConsumerNote?Userid=string&UserAccessKey=string&PurchaseID=31263348&Note=Contacted+Consumer+to+Discuss+Cancellation>

### *Definition of Parameters*

<b>Parameter</b>	<b>Definition</b>
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>PurchaseID</b>	Purchase ID assigned to the subscription being updated.
<b>Note</b>	Specific text you are adding as a note in the system.

## Get Postback IP List

Use this request to return a list of IP addresses where SegPay's postback notifications originate, so you can whitelist the IPs in your system.

### *Making the request*

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/ADM.aspx/GetPostbackIPList?Userid=string&UserAccessKey=string>

### *Definition of Parameters*

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).

## **Blacklist an IP address (for a specific site)**

Use this request to blacklist an IP address. This prevents access to your site from that IP, however it will not blacklist the IP globally in SegPay's system. If you have multiple accounts, you'd need to send requests for each individual account where you want to block that IP.

### *Making the Request*

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/adm.aspx/InsertMerchantFraudIPAddress?Userid=string&UserAccessKey=string&IPAddress=string&ReasonCode=string&Comment=string>

### *Definition of Parameters*

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).
<b>IPAddress</b>	IP address to be blocked from future transactions on your account (for the userID passed, only) including rebills.

<b>Reason Code</b>	Specify one of the following reason codes:	
	Reason Code	Description
	821	Poor Quality
	822	No Access
	823	Site Down
	824	Fraud
	825	Tired of it
	826	Other
<b>Comments</b>	Additional comments about why the IP was blocked.	

#### *System Responses*

After submitting the post to our system, you will receive one of following responses:

<b>Response</b>	<b>Definition</b>
<b>1 Record inserted</b>	The IP address was blocked successfully.
<b>0 Records inserted, must be a designated reason code</b>	The Reason Code sent is invalid.
<b>0 Records inserted, IP Address already exists</b>	The IP address you specified is already blocked on this account.
<b>Invalid Merchant - InsertMerchantFraudIPAddress</b>	Either the username or password you sent is incorrect.
<b>Missing Parameter</b>	One of the parameters listed above is missing from your request. Examples:  Cannot convert to System.Int32.  Parameter name: type ---> Input string was not in a correct

	format.
--	---------

### Reporting

You can use the SegPay Reporting Service (SRS) to request a list of your blacklisted IPs at any time:

<https://srs.segpay.com/MWS.asmx?op=GetMerchantFraudIPAddress?UserID=string&UserAccessKey=string>

Parameter	Definition
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).

Here is an example of the report you will receive:

```
<IPAddress>192.168.1.999</IPAddress>

<Reason>Other</Reason>

<Comment>FraudTest</Comment>

<AddedDate>2012-02-07T16:54:56.75+00:00</AddedDate>

<AddedByIPAddress>65.97.149.194</AddedByIPAddress>

<UserID>SegPayBlue</UserID>
```

### Blacklist an Email address (for a specific site)

Use this request to blacklist an email address. This prevents transactions submitted with that email, however will not blacklist the email globally in SegPay's system. If you have multiple accounts, you'd need to send requests for each individual account where you want to block that email.

### Making the Request

Make a GET request to the SegPay system, passing the parameters below. For example:

<https://srs.segpay.com/adm.aspx/InsertMerchantFraudEmail?Userid=string&UserAccessKey=string&EmailAddress=string&ReasonCode=string&Comment=string>

#### Definition of Parameters

Parameter	Definition														
<b>UserID</b>	Your username to access SegPay Reporting Services (SRS).														
<b>UserAccessKey</b>	Your unique key to access SegPay Reporting Services (SRS).														
<b>Email Address</b>	Email address to be blocked from future transactions on your account (for the userID passed, only) including rebills.														
<b>Reason Code</b>	Specify one of the following reason codes: <table> <tr> <th>Reason Code</th><th>Description</th></tr> <tr> <td>821</td><td>Poor Quality</td></tr> <tr> <td>822</td><td>No Access</td></tr> <tr> <td>823</td><td>Site Down</td></tr> <tr> <td>824</td><td>Fraud</td></tr> <tr> <td>825</td><td>Tired of it</td></tr> <tr> <td>826</td><td>Other</td></tr> </table>	Reason Code	Description	821	Poor Quality	822	No Access	823	Site Down	824	Fraud	825	Tired of it	826	Other
Reason Code	Description														
821	Poor Quality														
822	No Access														
823	Site Down														
824	Fraud														
825	Tired of it														
826	Other														
<b>Comment</b>	Additional comments about why the email was blocked.														

#### System Responses

After submitting the post to our system, you will receive one of following responses:

Response	Definition
<b>1 Record inserted</b>	The email was blocked successfully.
<b>0 Records inserted, must be a</b>	The Reason Code sent is invalid.

<b>designated reason code</b>	
<b>0 Records inserted, Email Address already exists</b>	The Email address you specified is already blocked on this account.
<b>Invalid Merchant - InsertMerchantFraudIPAddress</b>	Either the username or password you sent is incorrect.
<b>Missing Parameter</b>	<p>One of the parameters listed above is missing from your request.</p> <p>Examples:</p> <p>Cannot convert to System.Int32.</p> <p>Parameter name: type ---&gt; Input string was not in a correct format.</p>

## Data Availability Chart

A list of all the data elements available via SRS requests, as well as post back notifications.
